## ABOUT THE PROGRAM

In today's mercurial world of business, few would argue with the need to have a few tricks up your sleeve. It has never been more important to micro-manage costs in all sectors by increasing efficiencies within the overall supply chain.

## ABOUT CSCP CERTIFICATION

APICS, The Association for Operations Management, USA introduced CSCP certification program to develop and recognize professionals in Supply Chain Management. The CSCP program is contained in a body of knowledge developed by APICS and professionals can now obtain qualification as a Certified Supply Chain Professional (CSCP) after meeting the minimum qualification requirements and passing an examination conducted by APICS that is affiliated globally.

## NED OFFERS

APICS CSCP Preparatory Classes. Prepare for your CSCP Exam with pioneers of CSCP program in Pakistan. Focused Training and Preparation for Success!

## APICS CERTIFIED SUPPLY CHAIN PROFESSIONAL (CSCP)

- Validates mastery of supply chain and operations management concepts.
- The first and most well-recognized educational program to cover the end-to-end supply chains.
- Professional development, education and certification program.
- First certification program to focus on the end-to-end global supply chain.
- The global standard in supply chain education and certification since its introduction in 2006.
- Consists of three courseware modules; one exam.

CSCP certified professionals are in high demand in the Middle East, USA, EU, Canada and Australia and command lucrative salaries and chances of making excellent high paying career. Australian immigration rules give extra marks for CSCP certification.

Whether you are an established senior professional or seeking to enhance your professional profile, immigration chances and/or improve your job prospects in Pakistan and lucrative international markets, CSCP certification is the key.

CoPE invites your to sign up for CSCP – a wide-reaching training program in supply chain management. CSCP provides delegates with the fundamentals that they will need to manage the supply chain and operations effectively within your organization. Presented in three modules, it introduces delegates to supply chain know-how from end to end. By applying knowledge learned in this market-leading course to their day to day work, your business will not only benefit from highly-skilled management. It should crucially see significant cost savings in core areas such as customer service, lead times, capacity and inventory.

## WHO SHOULD ATTEND

This Program has been designed for those who are responsible for the general business and strategic management of product supply and development, including:

- Personnel from manufacturing, product development, and purchasing and distribution
- Supply chain managers and project management personnel in any company which manufactures or distributes products, including component manufacturers, contract manufacturing companies, semi-conductor manufacturers, equipment manufacturers, consumer goods manufacturers, telecom companies, financial services companies, and retailers who would like to control more of the supply chain
- Individuals planning to appear in CSCP exam.
- Materials managers
- Functional management
- Employees in cross-functional departments
- Consultants facilitating supply chain functions or working with ERP

## MEET YOUR EXPERT FACILITATORS

**Mr. Mohammed Aslam Mustafa**
